

Air Quality Reports

Comprehensive compilation of trends and insights

Benefits

Understand trends, influences and changes of air quality. Brings transparency and helps enable action

Clearly structured information in an easy-to-read

Various options available with regard to:

- level of detail
- reporting period
- information and
- presentation format

Features:

- ✦ Evaluation of O3, NO2, PM2.5, PM10, additional environmental parameters such as temperature, air pressure and humidity and other additional data possible (weather, traffic, ...)
- ✦ Efficient, automated compilation of data
- ✦ Reports are consistent with views in the dashboard
- ✦ Included as built-in service in bundles; subscription to more detailed reports possible

Air Quality Reports

Comprehensive compilation of trends and insights

Data Reporting

- Pollutant readings in tabular format
- Reporting period: 1 month
- Content: calibrated Sentience data and data from public measuring stations, as available, for the project area
- Format: PDF

Analytics Reporting

- Display of time-based trends for air quality and weather parameters in graphical format
- Reporting period: 1 month
- Content:
 - calibrated Sentience data and data from public measuring stations as available for the project area
 - weather patterns
- Format: HTML (allows user interactivity within the report)

Interactive Reporting

- Display of all integrated data across tables, charts and graphs with free selection of parameters (temporal, spatial)
- Reporting period: user defined
- Content:
 - all integrated air quality data
 - weather patterns
 - in addition, data provided on traffic, demography, land use, etc. (where necessary)
- Format: HTML

Event Reporting

- Dedicated report of changes in air quality as a result of a specific event in graphical format
- Content: air pollutants correlated with weather data (additional data available at extra cost)
- Reporting period: free definition of the 'event period' and the prior and subsequent reporting period
- One-off report
- Format: PDF
